

EM Mud Ball

MATERIALS for 100 Mud Balls

Soil
14kg
clayey soil
is suitable

EM Bokashi
700g
Rice bran can be
used alterably.

Activated EM-1
4-5L

PROCEDURE

① Mix soil with EM Bokashi
in a deep tray.

④ Cover the bottom of the
container with newspaper
and put the mud balls in it.

⑤ keep the container out of
direct sunlight and strong
wind to avoid getting dry
too fast.

② Add as much Activated EM
as the mixture becomes
moisturised enough to be
rolled

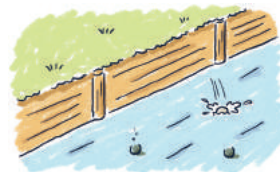

⑥ mudballs are ready to be
used when their surfaces
are covered with white
fungus.

⑦ Toss one mudball for each
square meter of the river
(More can be applied when
sludge is in large quantity).

③ Roll a handful of the
mixture into a ball

NOTE

1. Mudballs are ready to use as long as it is dry and hard like a rock
2. The color of fungus can be various.
3. Mudballs can be also used as a soil enhancer.
